All data within **TacitMoney** is fully encrypted and accessible via multi-factor authentication, together with other security measures to ensure your data is protected at all times.

A. All information is securely sent and received encrypted, which means that information cannot be read by anyone listening between your computer and the **TacitMoney** service. Even when we process any of your data internally, we still encrypt it.

Our technology partner moneyinfo protects its infrastructure in several ways using advanced technologies and also using a Security Operations Centre (SOC), which monitors what happens in our environments 24/7/365. This means if something looks suspicious, our SOC will inform us immediately. Also, your data is stored in an environment located in an ISO27001 certified facility, that is protected by the very best in physical security, electronic security and internal security policies to ensure that your details remain totally secure.
